RF Market Data Connectivity_

RF Insight Offering

The RF Insight offering utilizes millimeter wave networks to deliver ultra-low latency market data to trading firms in the New Jersey metro trading hubs. Utilizing innovative wireless network technology, RF Insight delivers critical data 40% to 50% faster than any fiber-based network.

Key Benefits

Unparalleled Speed

RF Insight provides customers the quickest market data delivery option, enabling faster consumption of data for more effective decision-making.

Minimal Infrastructure & Set Up

Nasdaq delivers raw, low latency market data feeds to your co-located cabinet via a 10G cross connect via BGP or Static routing.

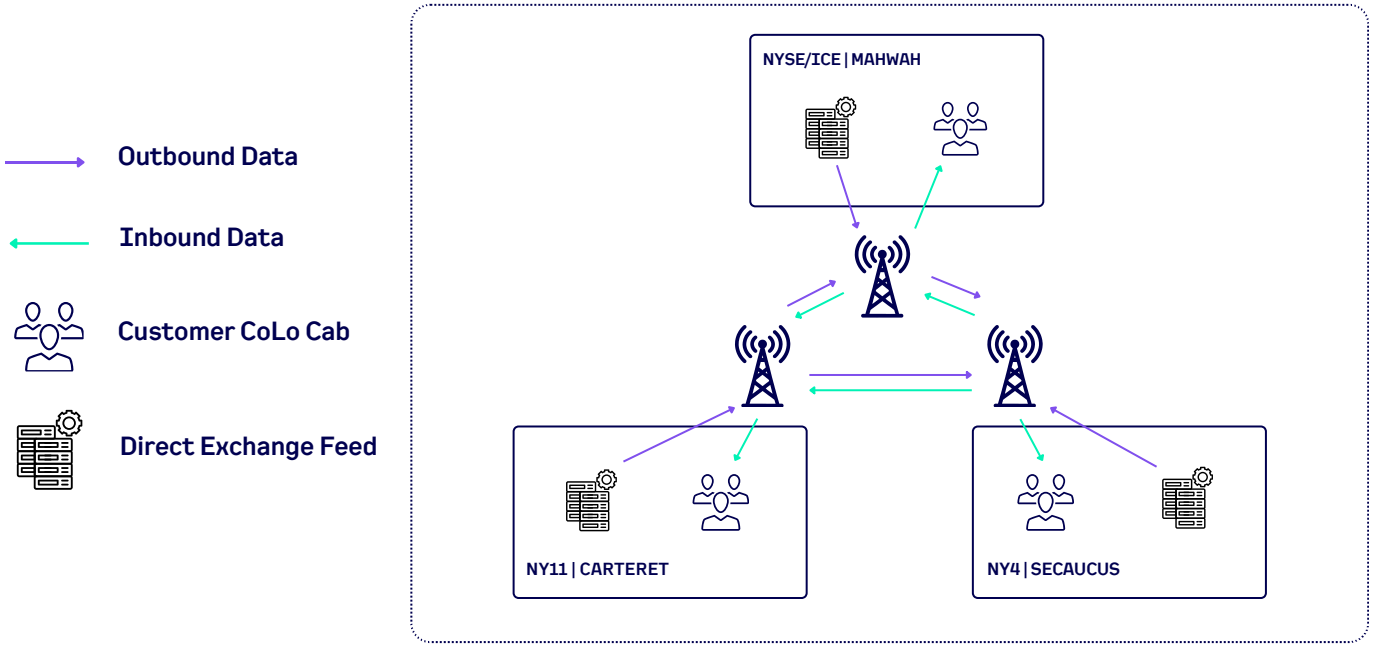

Flexibility

Receive one, two, or all of the low latency market data feeds at any of the metro trading hubs.

Quick Turn-Up

New orders can be completed within 48 hours of client request.

RF Insight Centers

Multiple raw U.S. equities depth-of-book market data feeds available from Nasdaq, NYSE, Cboe, IEX, MEMX, and MIAX Pearl.
